WCP Highlights

Production of bituminous coal and lignite in the week ended January 21, 1984, as estimated by the Energy Information Administration, was 15,073,000 short tons. This was a decrease of 1,695,000 short tons, or 10.1 percent from production in the previous week. Production in the corresponding week of 1983 was 14,698,000 short tons. Bituminous coal and lignite production from January 1 through January 21, 1984 totaled 44,666,000 short tons, 0.3 percent above production in the same period of 1983.

Production of Pennsylvania anthracite in the week ended January 21, 1984, as estimated by the Energy Information Administration, was 75,000 short tons, a decrease of 9,000 short tons or 10.7 percent from production in the previous week. Production in the corresponding week of 1983 was 59,000 short tons. Anthracite production from January 1 through January 21, 1984 totaled 223,000 short tons, 19.3 percent above production in the same period of 1983.

Based on the CIF Cost.

In 1982 the respondents to the survey were plants larger then 25-megawalt capacity. In 1983 the limit was raised to 50-megawalt capacity.

Note: Total may not equal sum of components because of independent rounding.
